

How to get the camera's version information (All models)

Please log on camera via IE, follow to the below pic to the version interface, then snapshot and send us the version information details.

The screenshot shows a web browser window with the URL `http://192.168.1.188/`. The browser tabs show 'Configuration'. The main navigation bar includes 'Live', 'Playback', 'Alarm', 'Local Setup', and 'Configuration' (highlighted with a red box). The left sidebar contains 'Camera', 'Network', 'PTZ', 'Event', 'Storage', and 'System'. At the bottom of the sidebar, 'Information' and 'Version' (both highlighted with red boxes) are visible. The main content area displays the 'Version' information:

Version	
Kernel Version	Linux 3.18.30 #15 PREEMPT Fri Mar 30 15:27:46 CST 2018 armv7l
File System Version	MC400L-NM223-N_AF_V0_BU_Y_EN-DH-H5_L V2.3.15 build 2018-11-21 11:19:40
Web Version	2018-09-07 12:28:00
S/N	EF000000029D935
Web Plug-in Version	1.0.8.7 Download Web Plug-in
