How to Disable the Spotlight Function of the U Series Camera

Method 1 (Anpviz U series NVR conneced)

Set on local NVR menu.

Enter the NVR system Menu-Camera-Image through the mouse on the local monitor, and set the night vision mode to infrared light mode for the corresponding channel, as shown in the figure:

Method 2 (Anpviz U series NVR conneced)

Modify the settings through the Phone App Guard Viewer.

When previewing the live broadcast screen, enter the menu settings and change the camera' s day and night mode to infrared mode, as shown in the figure :
